## calculating interest

## directions

Write the answers to the following questions in the blanks provided. Use the space below each problem to show how you arrived at your answers.

1. If you put $\$ 200$ in a savings account that paid $5.5 \%$ simple interest each year, how much interest would you earn in five years?
2. If you put $\$ 150$ in a savings account that paid $6 \%$ compounded yearly, how much interest would you earn in five years?
3. If you put $\$ 25$ each month into a savings account that paid a simple interest rate of $6.5 \%$ each year, how much would you have in your account at the end of two years?
4. If you put $\$ 10$ each week into a savings account that paid $6 \%$ interest compounded yearly, how much money would you have in your account after three years?
(Hint: Use Save a Million Calculator)
